DURATION

Classroom: 1 day

Online: 2 sessions x 4 hours

CAPACITY

Classroom: max 20 participants

Online: max 30 participants

An executive overview course designed to maximize your return of time investment by understanding what program management is about in the shortest possible duration.

Course Summary

Tactical objectives implementing the organizational strategy usually require multiple related projects and other work to be managed together as programs to obtain maximum benefits with available resources.

If portfolio management focuses on doing the right things, project and programme management focus on doing things right, In the resource-constrained 21st century this requires capacity optimization and alignment through program management.

This course will help participants to better understand the approach and framework to establish and manage efficient programs that respond to these challenges while ensuring the delivery of organizational objectives aligned with overall strategy.

This will allow participants to immediately increase the programs effectiveness and efficiency, in order to maximize the business value obtained while utilizing the same resources.
